L. Diamond, ORC-SUPPOLREP NO.: Forty-one (41)
INCIDENT NAME: Duane Marine
SITE/SPILL NO.: 20
POLLUTANT: Contaminated Oil, Drums, and Tanks
CLASSIFICATION: Potential Major
SOURCE: Duane Marine, 26 Washington Street,
Perth Amboy, New Jersey
WATER BODY: Arthur Kill1. SITUATION:

A. Same as stated in previous POLREP.

2. ACTION TAKEN:

A. During the period of March 10, 1986, through March 14, 1986 cleanup activities were continued by ENSCO on Tank #27.

B. On Monday and Friday, March 10 and 14, 1986, ENSCO made a total of five (5) shipments of PCB contaminated sludge from Tank #27. A total of 318 drums of PCB contaminated sludge were shipped weighing approximately 175,080 pounds. One of the five (5) shipments made on Friday, March 14, 1986, also contained 46 drums of flammable liquid waste weighing approximately 25,300 pounds. The shipments were made to ENSCO, Inc., Eldorado, Arkansas (EPA I.D. #ARD069748192) under Manifest Numbers AR83691, AR83694 through AR83696, and AR83700.

C. The soil cleanup activity of this site is under review. The responsible party work order calls for removal of visibly contaminated soil. EPA will advise the responsible party whether removal of visibly contaminated soil is appropriate or further soil sampling is required.

D. It should be noted that the Duane Marine site disposal work plan predate's EPA's June 6, 1985 CERCLA off-site disposal policy (requiring an EPA approved disposal site). This fact was stated to the private party in a letter dated August 13, 1985 from Margaret Thompson, Assistant Regional Counsel, EPA Region II, which informed them that the project is exempt from compliance with this policy.

3. FUTURE PLANS AND RECOMMENDATIONS:

A. EPA will continue to monitor the Duane Marine Site during Phase II cleanup operation. A meeting is scheduled for Tuesday, March 18, 1986, at the site with the responsible party to discuss the soil cleanup activity.

B. Private party estimates project completion by March 1986.
